(54) MACHINE TRANSLATION METHOD AND TERMINOLOGY DICTIONARY SELECTING METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To automatically set environment according to the contents of a document by setting a prescribed condition to be the base of translating processing according to document identification information specifying a document used at the time of obtaining a document to be a translating object.

SOLUTION: A control part 2 inputs identification information of a document to translate from an inspecting device 200 by controlling a communication equipment or using communication between processors. Continually the part 2 sends obtained document identification information to a communication part 3 to obtain the content of the document specified by identification information. Next, the part 2 sends document identification information to a field judging part 7 to decide the special field of the obtained document. In addition the part 7 sends an instruction of selecting a terminology dictionary corresponding to the decided special field to a translation part 4. Next, the obtained document is sent to the translation part 4 to execute translation. At the time a translation part 4 translates by using the selected technical word. At last, a translating result is sent to the inspecting device 200 for internet through communication between processors.

LEGAL STATUS

[Date of request for examination] 11.09.2000

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
